

# How Cromemco plugs you into the state of the art.

Cromemco offers you the most complete line of S-100 boards and peripherals in the business. These boards use the new IEEE-696 state-of-the-art standard. One-stop shopping can satisfy your design needs the easy way.

You can build one system, or a hundred, exactly the way you want, and upgrade existing systems with a simple board swap or addition. And since we design our own boards for our own systems, we always take advantage of the latest developments in IC technology.

**68000 microprocessor performance.** Cromemco's Dual Processor Unit gives you the best of both worlds: the

68000 and the Z-80A microprocessors on the same board. It's the easiest way to move into 68000 performance and still use your existing 8-bit software. Or use Cromemco's Z-80A CPU board or our Z-80A-based single board computer.

For selection, Cromemco can't be matched. From the well-known SDI High Resolution Color Graphics board to the new 512MSU, 512K byte RAM board. From our highly reliable Local Area Network interface (C-NET) to our wide variety of general purpose interface boards. And you can put them in one of our 8-, 12-, or 21-slot card cages with our 12 amp PS-8 power supply to get your system into operation fast.

We have over 30 S-100 boards to fill your needs. And all are supported by a broad line of software. Our Board Products Catalog has the latest information. Call today for your copy, or to get the name of our nearest dealer or distributor. Or, write Cromemco, Inc., 280 Bernardo Avenue, P.O. Box 7400, Mountain View, CA 94039. Tel: (415) 964-7400. In Europe: Cromemco A/S, Vesterbrogade 1C, 1620 Copenhagen, Denmark.

In the U.S., contact your local Hall-Mark or Kierulff distributor.
